---

Radhica,

Could you call (920) 457-4441 ext. 77263 at 10:30. This is my supervisor's (Mike Cassidy) telephone number. I have a bad case of laryngitis and don't know that I can communicate effectively. He and I will both be there but it will be easier to communicate with him.

Thank you

ee

Hi Eric:

Thanks for your response. We have discussed this internally and also with our colleagues at headquarters, and we have some additional questions regarding the process.

Would it be convenient for you to have a brief telephone conversation tomorrow, June 1 at 10:30 am? If that time doesn't work, please suggest an alternate time tomorrow.

Look forward to hearing from you.

Radhica

**Subject:** Ref: Applicability determination request

Dear Mr. Eckert:

I have a couple of follow-up questions subsequent to the discussion we had over the phone yesterday.

1. Are the engines that are installed into the generator sets certified as “non-road” engines? **[The non-road engines used in our generators hold EPA certificates. Based on the definition in the CAA, being certified is not a requirement or condition to be a non-road engine.]**
2. What exactly is the final product coming out of your facility? My understanding from yesterday’s discussions is that it could be either a portable or stationary generator set. Please correct me if I am wrong.  
**[Yes, the generators could be either stationary or portable at the end customer’s site as we do not have control of the end user. The generators do not meet the definition of stationary when they are being manufactured/tested at our facility.]**

Look forward to hearing from you. Please feel free to contact me if you have any questions on the above queries.

Thank you.

Radhica
